TV fans delighted as Brexit renewed for another season

Like Bozhidar Bozhanov and 358K others like this.

Fans of Britain's long-running comedy-drama Brexit are today overjoyed after learning that another season of the popular show has been commissioned.

Just when it looked like the UK's telly addicts would need to find another boxset to binge it has been announced that Brexit – possibly the greatest farce since *Fawlty Towers* and a fantasy to rival *Game of Thrones* – will roll on for at least one more season.

Brexit aficionado Simon Williams had been bracing himself for the show's emotional finale.

"I'm so happy!" he said. "There's still so much potential with these characters, so many more votes they could have on Theresa May's deal.

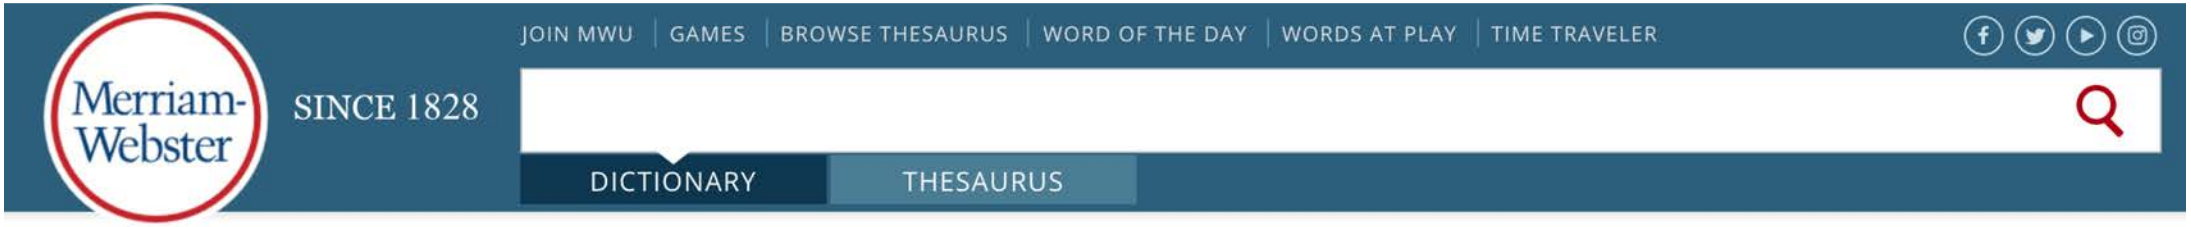
WAR ON CHRISTMAS: OBAMA ORDERS BAN ON CHRISTMAS CARDS TO MILITARY

What is “Fake News”?

Merriam-Webster: Self-Explanatory, No Need to Define



Words We're Watching

The Real Story of 'Fake News'

The term seems to have emerged around the end of the 19th century

The reason *fake news* is unlikely to be entered in our dictionary anytime soon is that it is a self-explanatory compound noun — a combination of two distinct words, both well known, which when used in combination yield an easily understood meaning. *Fake news* is, quite simply, *news* ("material reported in a newspaper or news periodical or on a newscast") that is *fake* ("false, counterfeit").

https://www.merriam-webster.com/words-at-play/the-real-story-of-fake-news

Secretary Brunnell Declares Fake News About His People is Being Telegraphed Over the Country.
—*Cincinnati Commercial Tribune* (Concinnati, OH), 7 Jun. 1890

Fake News. The following is handed to us for publication: Sunday's Enterprise says that I and a companion were run over by the Neptune and thrown into the water. As can be proved by more than one, we did not so much as get our feet wet, nor were we helped into the Neptune. Clarence Collins.
—*The Kearney Daily Hub* (Kearney, NE), 7 Jul. 1890

The public taste is not really vitiated and it does not in its desire for 'news' absolutely crave for distortions of facts and enlargements of incidents; and it certainly has no genuine appetite for 'fake news' and 'special fiend' decoctions such as were served up by a local syndicate a year or two ago.
—*The Buffalo Commercial* (Buffalo, NY), 2 May 1891

Meaning of **fake news** in English

fake news

noun [U] · UK /ˌfeɪk ˈnjuːz/ US /ˌfeɪk ˈnuːz/

false stories that appear to be news, spread on the internet or using other media, usually created to influence political views or as a joke:

There is concern about the power of fake news to affect election results.

— Thesaurus: synonyms and related words

True, real, false, and unreal

WIKIPEDIA
The Free Encyclopedia

- Fake news is a neologism often used to refer to fabricated news. This type of news, found in traditional news, **social media or fake news websites**, has no basis in fact, but is presented as being factually accurate.
- Fake news is a type of yellow journalism or propaganda that consists of deliberate disinformation or hoaxes spread via traditional news media (print and broadcast) or **online social media**
- Fake news is written and published usually with the intent to mislead in order to damage an agency, entity, or person, and/or gain financially or politically, often using sensationalist, dishonest, or outright fabricated headlines to increase readership. Similarly, **clickbait** stories and headlines earn advertising revenue from this activity.

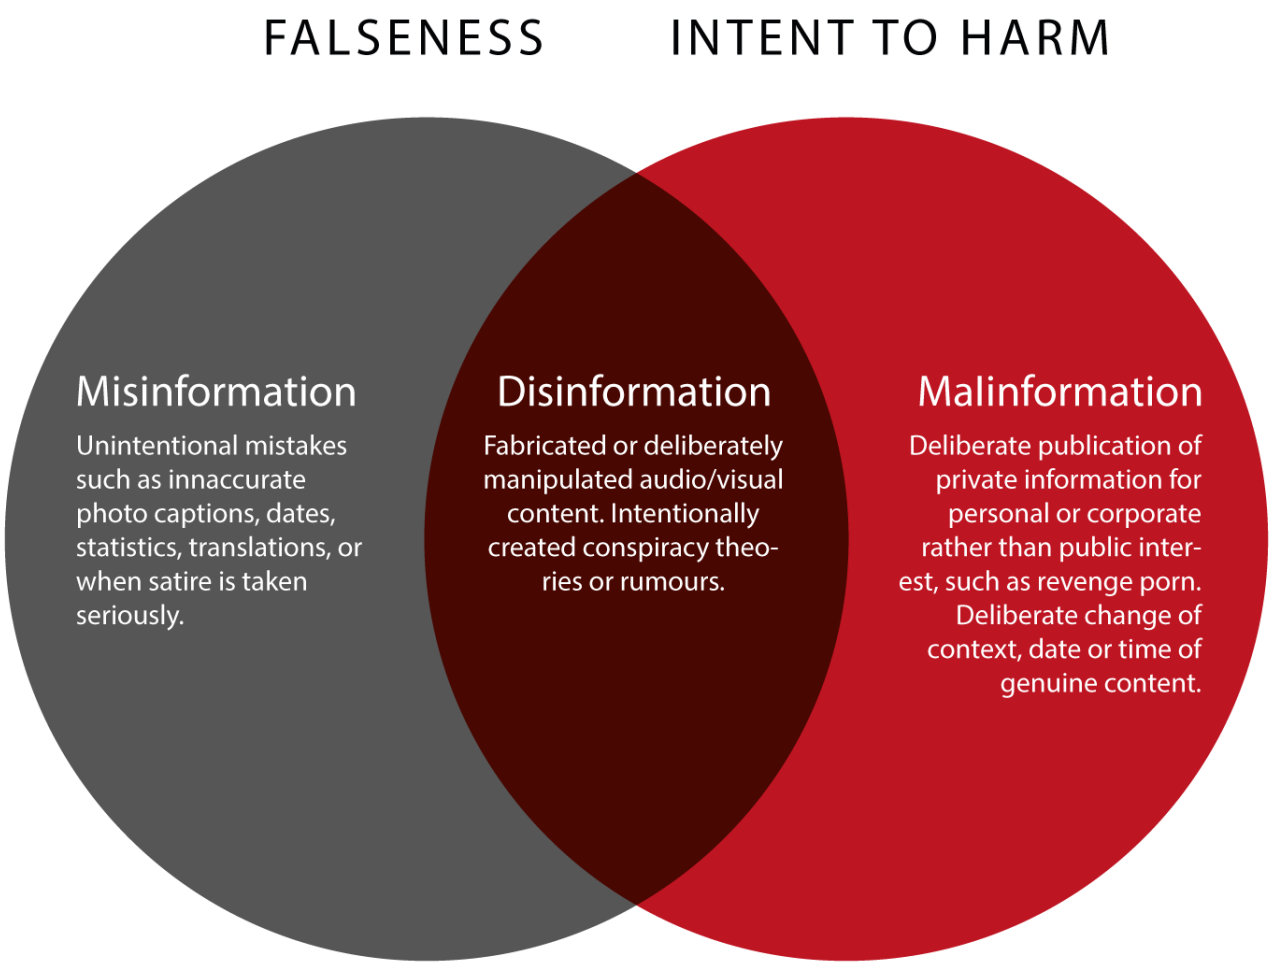
TYPES OF INFORMATION DISORDER



Claire Wardle of *First Draft News*

FIRSTDRAFT

7 COMMON FORMS OF INFORMATION DISORDER

SATIRE OR PARODY

No intention to cause harm but has potential to fool

MISLEADING CONTENT

Misleading use of information to frame an issue or individual

IMPOSTER CONTENT

When genuine sources are impersonated

FABRICATED CONTENT

New content is 100% false, designed to deceive and do harm

FALSE CONNECTION

When headlines, visuals or captions don't support the content

FALSE CONTEXT

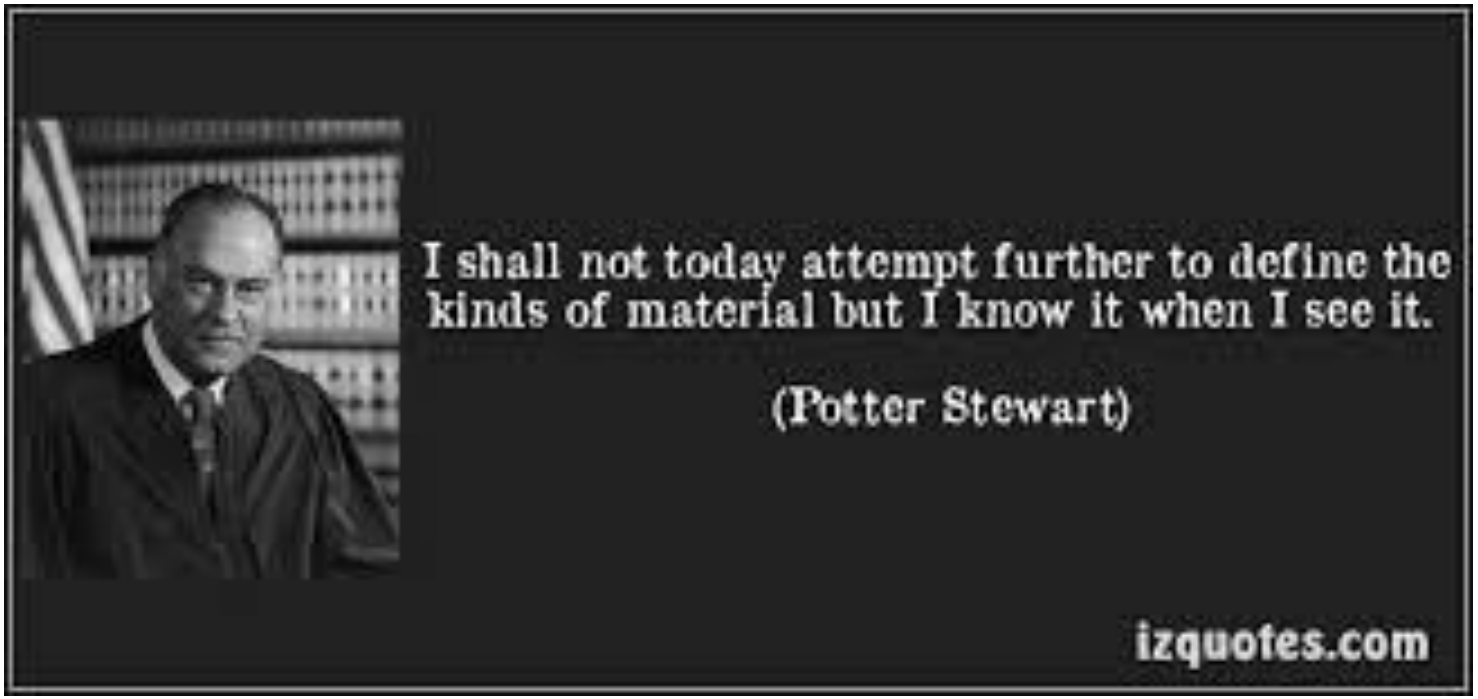
When genuine content is shared with false contextual information

MANIPULATED CONTENT

When genuine information or imagery is manipulated to deceive

Claire Wardle of *First Draft News*

Maybe it Cannot be Formally Defined, but People Recognize It When They See It



I shall not today attempt further to define the kinds of material I understand to be embraced within that shorthand description ["hard-core pornography"], and perhaps I could never succeed in intelligibly doing so. But I know it when I see it.

US Supreme Court Justice Potter Stewart in 1964

QUESTIONABLE SOURCE

http://www.angrypatriotmovement.com/

A questionable source exhibits *one or more* of the following: extreme bias, overt propaganda, poor or no sourcing to credible information and/or is fake news. Fake News is the *deliberate attempt* to publish hoaxes and/or disinformation for the purpose of profit or influence (Learn More). Sources listed in the Questionable Category *may* be very untrustworthy and should be fact checked on a per article basis. Please note sources on this list *are not* considered *fake news* unless specifically written in the notes section for that source. See all Questionable sources.

Bias: **Extreme Right, Conspiracy, Propaganda, Some Fake News**

Notes: The Angry Patriot is a very right wing biased website with many conspiracies and fake news stories. A very untrustworthy source that was placed on Politifact's fake news source list. (10/9/2016) Updated (6/20/2017)

RIGHT BIAS

These media sources are moderately to strongly biased toward conservative causes through story selection and/or political affiliation. They may utilize strong loaded words (wording that attempts to influence an audience by using appeal to emotion or stereotypes), publish misleading reports and omit reporting of information that may damage conservative causes. Some sources in this category may be untrustworthy. See all Right Bias sources.

National Review

From Wikipedia, the free encyclopedia

This article is about the American magazine. For other uses, see National Review (disambiguation).

National Review (***NR***) is an American semi-monthly conservative editorial magazine focusing on news and commentary pieces on political, social, and cultural affairs. The magazine was founded by the author William F. Buckley Jr. in 1955.[3] It is currently edited by Rich Lowry.

Since its founding, the magazine has played a significant role in the development of conservatism in the United States, helping to define its boundaries[3] and promoting fusionism while establishing itself as a leading voice on the American right.[3][4][5]

The online version, ***National Review Online***, is edited by Charles C. W. Cooke and includes free content and articles separate from the print edition.[6]

When Left Is Right: Party Ideology and Policy in Post-Communist Europe

MARGIT TAVITS *Washington University in St. Louis*
NATALIA LETKI *University of Warsaw*

According to the classic partisan theory of spending, leftist parties are expected to increase government spending, and rightist parties are expected to decrease it. We argue that this relationship does not hold in post-Communist countries, where in the context of dual transition to democracy and to a market economy, leftist parties have had stronger incentives and better opportunities to enact tighter budgets, whereas rightist parties were compelled to spend more in order to alleviate economic hardships. We illustrate this theoretical argument with case studies from Hungary and Poland. We then test and find support for our theory by considering the influence of cabinet ideology on total, health, and education spending in thirteen post-Communist democracies from 1989 to 2004. We explore various alternative explanations and provide further narratives to support our causal argument.

The traditional partisan theory of policy outcomes predicts that left wing and right wing parties propose and adopt drastically different budgets. Because the Left prefers more government control of the economy and the Right advocates reliance on the market, leftist governments are expected to produce a bigger government in general and increased welfare (including health and education) spending in particular than rightist parties. The empirical research on advanced, mostly Western European democracies generally supports this theory (see, e.g., Alesina and Roubini not only did leftist parties have an incentive to pursue rightist economic policies, but they also had better opportunities to do so. Leftist parties could count on a loyal electorate, and therefore, policy reversals did not constitute a major threat to the stability of their electoral base. Their voter loyalty resulted from three reasons: (1) the traditional prowelfare image of leftist parties provided a safeguard against voter punishment because budget cuts by the Left, unlike those by the Right, could be interpreted as absolutely essential; (2) leftist parties in the region were much more consci-

Predicting Factuality of Reporting and Bias of News Media Sources

Ramy Baly (1), Georgi Karadzhov (3), Dimitar Alexandrov (3), James Glass (1), Preslav Nakov (2) ((1) MIT Computer Science and Artificial Intelligence Laboratory, (2) Qatar Computing Research Institute, HBKU, Qatar, (3) Sofia University, Bulgaria)

(Submitted on 2 Oct 2018)

We present a study on predicting the factuality of reporting and bias of news media. While previous work has focused on studying the veracity of claims or documents, here we are interested in characterizing entire news media. These are under-studied but arguably important research problems, both in their own right and as a prior for fact-checking systems. We experiment with a large list of news websites and with a rich set of features derived from (i) a sample of articles from the target news medium, (ii) its Wikipedia page, (iii) its Twitter account, (iv) the structure of its URL, and (v) information about the Web traffic it attracts. The experimental results show sizable performance gains over the baselines, and confirm the importance of each feature type.

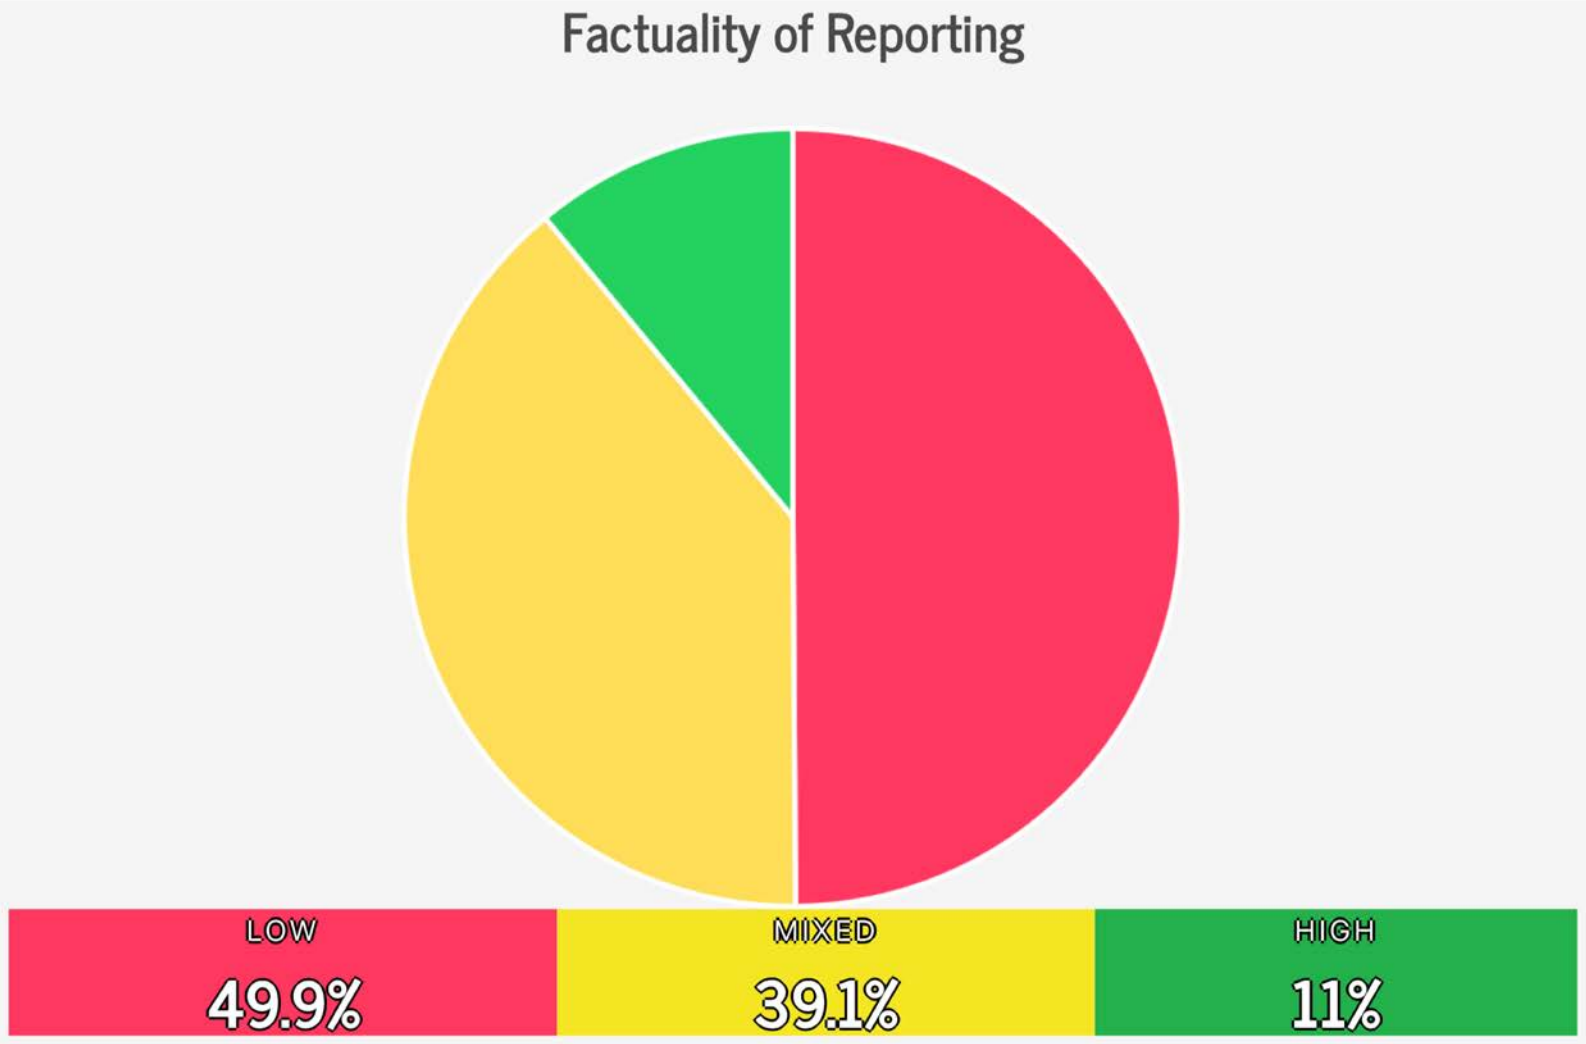
Our Analysis of the Previous Medium (in Tanbih)



In Media Bias/Fact Check

QUESTIONABLE SOURCE

Reasoning: **Extreme Right, Hate Group**

Notes: *FrontPage Magazine is an online conservative political website, edited by David Horowitz and published by the David Horowitz Freedom Center, a non-profit organization in Los Angeles, California. This source has a pretty strong right wing bias in reporting that often is negative toward minorities and Islam. Frontpage Magazine is also listed on the Islamophobia Network. The Southern Poverty Law Center has this magazine labeled as an anti-Muslim. (10/7/2016) Updated (D. Van Zandt 7/19/2017)*

- 7.3k instances

Giovanni Da San Martino, Seunghak Yu, Alberto Barrón-Cedeño, Rostislav Petrov, Preslav Nakov *Fine-Grained Analysis of Propaganda in News Articles.* EMNLP 2019

Technique • Snippet
loaded language • until forced to act by **a worldwide storm of outrage**.
name calling, labeling • dismissing the protesters as **lefties** and hugging Barros publicly
repetition • Farrakhan repeatedly refers to Jews as **Satan**. He states to his audience [...] call them by their real name, '**Satan**.'
exaggeration, minimization • heal the situation of **extremely grave** immoral behavior
doubt • **Can the same be said for the Obama Administration**?
appeal to fear/prejudice • **A dark, impenetrable and irreversible winter of persecution of the faithful by their own shepherds will fall**.
flag-waving • conflicted, and **his 17 Angry Democrats that are doing his dirty work are a disgrace to USA**! —Donald J. Trump
flag-waving • attempt (Mueller) **to stop the will of We the People**!!! It's time to jail Mueller
causal oversimplification • he said **The people who talk about the "Jewish question" are generally anti-Semites**. Somehow I don't think
causal oversimplification • will not be reversed, **which leaves no alternative as to why God judges and is judging America today**
slogans • **BUILD THE WALL!"** Trump tweeted.
appeal to authority • **Monsignor Jean-Franois Lantheaume, who served as first Counsellor of the Nunciature in Washington, confirmed that "Vigan said the truth. Thats all"**
black-and-white fallacy • Francis said these words: **Everyone is guilty for the good he could have done and did not do . . . If we do not oppose evil, we tacitly feed it**.
thought-terminating cliches • **I do not really see any problems there.** Marx is the President
whataboutism • President Trump —**who himself avoided national military service** in the 1960's— keeps beating the war drums over North Korea
reductio ad hitlerum • "Vichy journalism," a term which now fits so much of the mainstream media. **It collaborates in the same way that the Vichy government in France collaborated with the Nazis.**
red herring • It describes the tsunami of vindictive personal abuse that has been heaped upon Julian from well-known journalists, many claiming liberal credentials. The Guardian, **which used to consider itself the most enlightened newspaper in the country**, has probably been the worst.
bandwagon • He tweeted, "**EU no longer considers #Hamas a terrorist group. Time for US to do same."**
obfusc., int. vagueness, confusion • **The cardinal's office maintains that rather than saying "yes," there is a possibility of liturgical "blessing" of gay unions, he answered the question in a more subtle way without giving an explicit "yes."**
straw man • "Take it seriously, but with a large grain of salt." **Which is just Allen's more nuanced way of saying: "Don't believe it**."

QCRI team honoured for innovation at tech expo

TRIBUNE NEWS NETWORK
DOHA

A team of scientists from Qatar Computing in Amsterdam.

A team of scientists from Qatar Computing Research Institute (QCRI) at Hamad Bin Khalifa University have received recognition for their contribution to a media-telecom catalyst project on AI indexing for regulatory compliance that uses artificial intelligence to identify, index and measure political balance.

The project aims to detect false claims and to enhance the accuracy of video content.

Developed in partnership with Al Jazeera, Associated Press, RTE Ireland, Tech Mahindra, V-Nova and Metaliquid, the project seeks to support broadcasters and content owners with their regulatory measures and compliance processes.

QCRI worked on the compliance use of the project, developing the fact checking, news coverage, political bias detection and graphic content detection mechanism.

The team of QCRI scientists was honoured with an award at IBC2019, a leading media, entertainment and technology conference held in Amsterdam in September.

The global gathering saw more than 50,000 industry experts and researchers from 150 countries come together to showcase their latest innovations and participate in a number of topical discussions.
